**Objective:** Employment as a developer/system administrator in an intellectually stimulating environment

**Overview:** Over nine years of experience in Perl programming, Web development, and system administration.

- Highly advanced Perl programmer experienced in developing complex programs using Perl and SQL to create efficient and effective automated solutions.
- Experienced in installation, maintenance and customization of PHP applications.
- Experienced Website developer using HTML, CSS and JavaScript.
- Proficient in database design, management and optimization across multiple platforms including MySQL and Oracle.
- System construction and administration including Linux, Solaris, BSD and NT systems.

**Experience:** **Dreamseller Inc., Baltimore, MD** Senior Developer/System Admin 10/1999 - Present

- Designed and developed fully dynamic SQL powered websites and applications to meet company objectives.
- Managed projects and other programmers throughout all aspects of the project development cycle, enabling site launch prior to the set deadlines.
- Reduced development time and costs through effective management.
- Constructed and administered company's Linux server farm including web servers, DNS servers, FTP and mail servers.

**Independent Developer** Consultant and developer 1998 – Present

- Worked closely with clients to define and implement appropriate and effective solutions addressing areas of client concern such as budget, schedule, and project status reports.
- Developed a variety of Websites, Perl and SQL applications to meet client objectives.
- Modified existing client programs to optimize efficiency, speed and scalability.
- Provide contract system administration and emergency support.

**Netstorm Internet, Frederick, MD** Developer/System Admin 11/1997 - 10/1998

- Provided Perl programming and web design services for clients developing websites and creating fully dynamic e-commerce sites.
- Crafted Perl programs to automate day- to- day activities and system maintenance.
- Designed, installed and administrated Linux/NT server farm including web servers, DNS servers, FTP , mail servers, and Radius servers - resulting in a highly stable server environment for ISP clients..
- Provided technical support for web hosting and Internet access clients resulting in reduced average call duration and lowered churn rate.

**Digiweb, Inc., College Park, MD** Tech Support/Junior System Admin 1/1997 - 11/1997

- Assisted in administration of Solaris based server farm including creation of Perl and shell script programs to automate tasks. Provided technical support for web hosting clients.
- Reduced client downtime by providing timely administration and modification of clients' programs for speed.
- Created automated quota system allowing more efficient billing of web hosting customers.

**Education:** **Frederick Community College**

Associate of Science degree, 2005: Computer Science - GPA: 4.0 - High Honors

**University of Maryland, College Park**

1996 - 1998 GPA: 3.2
